How many metres is 8.75 km?

X 1000

8.75km = 8750m

341ml in l is 3.41l. Is this correct? If not what have I done wrong?

This is wrong. There are 1000ml in 1l so you need to divide by 1000, which would be 0.341l. You have only divided by 100.
